

SOC Triage Note

SECURITY OPERATIONS CENTER • ALERT INVESTIGATION NOTE

ALERT ID AL01	CATEGORY Reported Email	CLASSIFICATION False Positive	TICKET STATUS CLOSED
------------------	----------------------------	----------------------------------	-------------------------

SUMMARY & EXECUTIVE RESOLUTION

Verdict: False Positive. The reported email was verified as a legitimate corporate newsletter transmitted via an authorized Email Service Provider (ESP). Email authentication standards (SPF, DKIM, DMARC) fully passed, sender IP reputation is clean, and the content contains no malicious artifacts. The reporting user was notified and thanked.

KEY FINDINGS & EMAIL TRIAGE ANALYSIS

ANALYSIS VECTOR	OBSERVED TECHNICAL DETAILS & VALIDATION
Header & Domain Alignment	From Domain: clouddora.com Return-Path / Envelope From: *.clouddora-marketing-esp.example Message-ID Domain: Matches ESP infrastructure (*.clouddora-marketing-esp.example)
Authentication	SPF / DKIM / DMARC: PASS. Sending IP is explicitly authorized within the domain's publishing SPF record.
IP Reputation & Logs	Threat intelligence and internal SIEM logs confirm originating IP is clean with no history of malicious activities or suspicious abuse indicators.
Content & Payload	Standard marketing newsletter containing product roadmaps, customer stories, and team updates. No malicious URLs, embedded tracking scripts, or attachments identified.

REMEDIATION & ACTIONS TAKEN

- Performed complete header, domain alignment, and SPF/DKIM authentication verification.
- Evaluated originating IP address against internal SIEM logs and threat intelligence feeds to confirm legitimate history.
- Sent notification email to the reporting user thanking them for flagging the email and assuring them that the message is safe.
- Closed ticket/alert **AL01** as **False Positive**. No further analyst action or escalation required.
